

Addendum #1 Heard County 2010 Resurface Project

Answers to some questions that have been raised:

- 1) Heard County will be responsible for shoulder grading and “Low/Soft Shoulder” signs.
- 2) Paving over bridges is NOT required. Contractor is responsible for providing a smooth transition from new asphalt to bridge.
- 3) Contractor will provide a smooth transition at side roads and driveways. In most cases this should require simple “run the gate out” 2-4 ft.
- 4) Shuttle Buggie is required on all roads for “Wear Surface Only”.
- 5) Temporary pavement markings are not required to allow pavement to cure. However, temporary markings are required for safety reasons until marking contractor arrives.
- 6) Hydrated Lime is required in all asphalt mixes per DOT specs.
